

Call for Expression of Interest

CAP-RED's First Round of Piped Water Supply Investment Grant

The Cambodia Australia Partnership for Resilient Economic Development (CAP-RED) is Australia's flagship development investment working with the Cambodian government and the private sector to support:

1. Agricultural transformation
2. Trade, investment, and enterprise development
3. Infrastructure services

CAP-RED is opening its first round of grant support to private water operators (PWOs) and piped water supply investors in **Kampong Thom**, **Kampong Chhnang**, and **Takeo** provinces. The support includes investment grant and technical assistance to help piped water suppliers to establish and expand their water supply infrastructure in service areas they would not have otherwise invested in a foreseeable timeframe.

The grant support is applied to (1) PWOs who have received a 20-year permit and (2) piped water supply investors who receive a permission from MISTI to conduct a feasibility study in a service area in the above provinces.

Application form to request for support can be obtained from and submitted via infor@capred.org or **Telegram 012 817 829**.

CAP-RED would like to invite interested PWOs and investors to receive more information in our briefing workshops at Departments of Industry, Science, Technology and Innovation (DISTI) of the 3 provinces. CAP-RED encourages both wife and husband of PWOs to attend the information session.
