Piped Water Supply: Where is Attention Required?

Water Supply Sector Context

- Public waterworks cover approx. 60% of villages in their service area
 - 45% of total households have connections
- PWOs cover approx. 58% of their service area
 - 42% of households have connections

HHs in service area (current) of provider

Piped Water Supply: What Support is Proposed?

Incentives for Improved Performance:

Investment
Support

Technical
Assistance

Regulatory
Reform

Key principles of approach:

- Filtered entry, to prioritise committed and better performing PWOs
- Conditional to achieving performance targets or output based
- Time bound
- Consequences for not achieving agreed targets

Demonstrate efficient and effective use of support provided: professionalise and perform

Thank You
